

Situation Overview

- On August 8, Brazil surpassed the mark of 100 thousand deaths due to COVID-19 and more than 3 million confirmed cases of the disease since the beginning of the pandemic.
- Since March 22, Brazil occupies the second world position in the total of confirmed cases of COVID-19, behind only the USA.
- In many states, social distance measures are beginning to be relaxed, including the return to face-to-face classes in the public school system. This is the case of Amazonas, a state that collapsed health and funeral systems, and restarted classes in public schools on August 10.
- For almost three months, the country has been without a Minister of Health, and the position is taken on an interim basis.

COVID-19
Statistics

Confirmed cases **3,359,570**

Deaths **108,536**

Data as of August 17, 2020

Response Activities

- World Vision Brazil responds directly to the emergency caused by the new coronavirus in 12 states and, indirectly, in 9 others, through partners in the Juntos pela Crianças movement.
- Priority actions include cash transfers and food distribution. Hygiene and cleaning kits, playful and educational materials and informative content are also distributed. New partnerships will also allow the installation of mobile sinks and the training of health professionals in the coming months.
- A new project, started in July and in partnership with USAID / OFDA, will allow World Vision Brazil to increase its action against COVID-19 in three cities in Amazonas (Manaus, Manacapuru and Novo Airão). With a duration of 6 months, the project aims to impact 25,000 people.

Advocacy Messages

World Vision calls for the expanding of social programs for the most vulnerable groups living in refugees camps, informal migrants occupations, slumps and the peripheral areas whose are more likely to suffer the effects of isolation, economy contraction and familiar violence.

World Vision is working in these areas focusing in the reduction of the collateral effects of the covid-19 spread with WASH supplies, education virtual tools, protection virtual tools for children and their families and food kits distribution reaching the same objectives as the UN system and the general country.
